

muzza style by Christian Kessler

We are now back in Germany after two beautiful weeks in England. We fished five stunning lakes and managed to catch a number of really awesome fish.

After the trip we started to fish a gravel pit in the Cologne area with some very good fish in it. With our Muzza Rigs and balanced baits we used KD Rigs fished on slack lines so fish would confidently travel into and around the baited area.

We carefully prepared a simple mix with small particles like hemp and maize and presented this by spodding it onto our chosen spots.

A stunning 43lb mirror.

The carp in this venue had obviously not seen this method of presentation, and we soon saw a tremendous response and caught some beautiful fish.....happy days!
