

## CC Moore Team success in the Spain III M-Class Cup

A very creditable third place was secured by Enrique Cid and Arturo Carrasquilla from CC Moore Team Spain during their participation in the competitive Milo Cup at Alange Lake in Spain.

A total of 67 pairs competed on a bad day of severe wind conditions, during which the arrival of a cold front and low temperatures hindered fishing dramatically, seeing only 14 pairs catch any fish at all.

Arturo and Enrique caught nine fish over the course of the event which saw them finish with only two pairs ahead of them.

Their total weight meant they finished just 100 grams behind the anglers in second place and only one good fish behind the winners!

Once again, N-Gage XP did the job for Arturo and Enrique. This was combined with hemp, tiger nuts and tuna flakes and was all then soaked in the awesome Feedstim XP.

The technique applied by the guys saw them solid pva bagging their mix along side crumbed boilies with a small pineapple Hellraiser fished over the top.

They used their mix on a small spot and fed 10 spods along side the pva and Hellraiser presentation.

Our best wishes and congratulations go out to Arturo and Enrique.

Well done!
