

It goes forward; The summer is back by Chris and Pierre in Germany

In the last two weeks we had the first time the feeling that we have summer in Germany. In these period we fished two different gravel pits in the region of NRW. The first venue was a middle size pool with a good carp stock but with lots of carp anglers. Our choice was to use small baits like dumbbells from the CC-Moore Live system Mix with a mix with Bloodworm and Milkimin pellets. These baits were placed on a prepared/baited. The other spot was fished with a single hookbait on a Shot Rig. The Dumbbell was fished with an imitation piece of corn on a KD-Rig that has worked brilliantly for us before. In the past, we caught lots of Carp with the KD Rig so we know how well it works.

So in two days we caught two Carp above 30 pounds.

The other venue we fished was a big gravel Pit with lots of weed and lots of anglers too. Our tactic was to dive our rigs onto clean areas between the weed. With a little tiger nut and a piece of imitation corn on a KD-Rig and with some pellets and mini tigers for loose feed, we caught two more carp in hard conditions.

Start to think, good luck
