

Live System

from CC Moore

Live System is an all season boilie that lends itself to any type of carp angling campaign; whether you're after runs from a day ticket venue or targeting one of the biggest fish in the country, the "System" is the bait for you.

It contains a mixture of milk and vegetable proteins, bird foods, yeasts, creamy powders and other digestible ingredients which when combined creates an "active" bait that is ideal for year-round use. It has a smooth creamy aroma with a subtle almond kick and is an attractive sandy colour which makes it very visually stimulating to fish in the low light conditions we face during the autumn and winter months.

What I love about this bait is its ability to catch even when the conditions are unfavourable; often catching fish when those around you are struggling.

It is so easy to use and for me has produced fish when I have used it in a variety of ways; whether pouring Feedstim XP or Live System Dip over the bait following its removal from the freezer, drawing in the powerful attractors making them even more irresistible or soaking them in lake water or heat treating with boiling water prior to fishing to give them a more washed out appearance to tempt more wary, pressured fish.

The matching bait dip really is a very useful 'tool' and easily soaks into and leaks out of the baits to which it is applied. It is also p.v.a. friendly so can be added to bags and sticks to increase the strength of the food signal they release and can be used for coating leads, lead-core and hook-links prior to casting when conditions are really tough.

Live System boilies are available in 10, 15 and 18mm freezer baits and 15mm and 18mm shelf life baits. Matching hookbaits include cork-ball and air-ball pop ups, wafers and hardened hook-baits in both 15mm & 18mm sizes and the superb 10mm x 14mm glugged dumbbell hook-baits, which have been infused with the matching dip. Pellets, stick mix, paste and even a ready to use 'Session Pack' help make a complete range that meets all your angling requirements with a top quality bait.

My personal favourite hookbaits are the glugged dumbbell hook baits. These are totally unique seem not to be seen as a "danger item" due to their shape and are extremely effective when fished amongst whole and chopped 10mm, 15mm, 18mm baits.

Results don't lie; you can't beat the System....
