

Moore Barbel action !

By Ashley Ward

A

recent 36 hr session on my local stretch of the Tidal River Trent resulted in the capture of 22 Barbel up to 13lb 03oz and a few Bream whilst fishing tight up to some snaggy turbulent water

Successful end tackle was 45lb ESP Leadcore Leaders, 10oz Korda Grippa leads with rigs made of 24" 10lb Korda IQ hook Fluro Carbon with sharp size 8 Korda Wide Gapes

Successful baits included Drilled Halibut Pellets, PVA Bags of 8mm Betaine H.N.V pellet dipped in either Marine Amino Compound or Trout / Halibut Pellet Oil, a killer combination. CC Moore doing the business again. All you coarse anglers out there, get on the CC Moore gear; you wont be disappointed!

Drilled Halibut Pellets

+

PVA bags of 8mm Betaine H.N.V Pellets

+

Dipped in Marine Amino

or

Dipped in Pellet Oil

A Summer Barbel of 13lb 03oz

= Deadly Combo
