FEEDSTIM XP LIQUID - Tim Richardson

Feedstim XP is a natural liquid food and incredible fish feeding trigger. It is literally a bait legend in the making – it's up there with Robin Red, Scopex and Tutti Frutti for example; but also good number of unique CC Moore products are up there too!

In this category I would include Feedstim XP Powder, Liquid Super Slop, Liquid Salmon and Krill Extract, Red Venom and others like Odyssey XXX, Meteor and Live System base mixes.

There is NO inclusion limit to Feedstim XP unlike concentrated flavours; so load up any of your baits with it to the MAX! Using both the liquid and powdered forms of Feedstim XP gives you maximum impacts for the longest duration under water. An easy example of using it in super-boosting a conventional bait is preparing tiger nuts with Feedstim XP Liquid and Feedstim XP Powder, with Lactose B Plus Concentrate, Pure Betaine and the alternative sweetener, Ultrasweet. (Try this stuff and it will really grow on you – and you'll see why fish really love it!)
